

## SAY GOODBYE TO TANGLED HEADPHONES AND FRAYED CHARGERS

We founded elewraps to solve a few problems that drove us crazy. Tangled headphones, frayed charging cords and stolen cables had become a daily frustration. elewraps add a layer of flexible plastic to stop those annoying knots and make your cables as uniquely colorful as you!

With elewraps, say goodbye to the infuriating days of the past and say hello to sweet, sweet sanity.

## WHY ELEWRAPS?

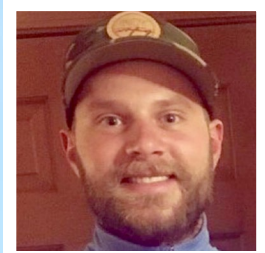

- Protect Cables
- Prevent Tangles
- Personalize Colors

## WHO WE ARE

We're just two regular guys, trying to make your life a little more colorful with a lot less knots. We spend our coffee-fueled Mondays through Fridays slaving away so we can spend the weekend adventuring in the mountains or traveling in search of new experiences. Whether out in nature or in the urban jungle, we know the feeling of tangled headphones and broken or stolen charging cords.

It really annoyed us, so we decided to fix it. Born in the LoDo district of Denver, the elewraps mission is to make sure that your cables never stop, just like you. --Grant and Zach
